Petition to Protect the Planet for Our Future

To: The Ventura City Council

From: The Youth of Ventura

The over-use of fossil fuels has created a crisis that will negatively and severely affect our futures.

Climate scientists are clear about what needs to happen to avoid disaster. Their targets require that we all take immediate and meaningful action to shift away from fossil fuels, before it’s too late.

We, students from El Camino High School, join with the youth of Ventura to hold our community accountable to do its part to end the climate crisis within our lifetime.
